

From Keosauqua Light & Power

Yes, I would like to support the use of renewable energy through Keosauqua Light & Power.

Enclosed is my \$25 contribution for Green City Energy. I will receive Keosauqua Green certificates that represent the environmental benefits from the production of 1,200 kilowatt hours (kWh) of renewable energy.

From Keosauqua Light & Power

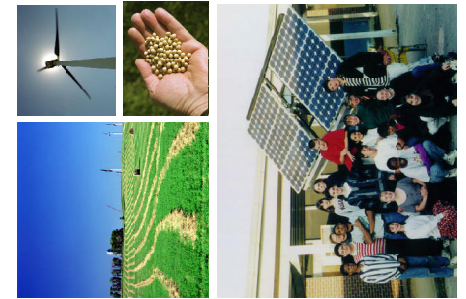

What is GREEN CITY ENERGY?

Green City Energy is a new program from Keosauqua Light & Power. Now the citizens of Keosauqua can join with people all over Iowa to support home-grown, renewable energy. How can you make a difference for the environment, economy, and energy security? By participating in Green City Energy from Keosauqua Light & Power.

Announcing a new program for home-grown, renewable energy

GREEN CITY ENERGY

From Keosauqua Light & Power

GREEN CITY ENERGY

From Keosauqua Light & Power

Of the energy we use in Iowa, 97% comes from fossil fuels such as coal, oil, and natural gas. What if, instead, we could harness the power of the clean, natural resources we have here? That's exactly what we can do through Green City Energy.

The United States possesses abundant renewable energy resources, including wind, solar, biomass, methane, solid waste, and wood. Renewable energy can be used to generate electricity, replacing some of the coal, natural gas, and petroleum that we currently use and often import from other nations.

Renewable energy is good for our environment, our farmers and rural economy, and our national security. Some renewable sources, such as wind and solar, produce no pollution at all. Others, such as biomass, biodiesel, and wood, are processed from agricultural crops and trees, creating jobs and income. The use of renewable resources decreases our dependence on imported energy.

Now you can contribute to the development of renewable energy. For your annual \$25 contribution, 1,200 kilowatt hours of clean, green, renewable energy will be produced. This replaces electricity produced from fossil fuels. Keosauqua Light & Power will continue to purchase electricity from Southern Iowa Electric Coop.

Green, renewable energy is growing, blowing, and flowing. Sign up for GREEN CITY ENERGY and help make a difference for our environment, economy, and energy security.

Questions and Answers about Renewable Energy and GREEN CITY ENERGY

What will it cost me to support renewable energy?

The cost to contribute for renewable energy will be \$25 per year. That contribution supports the production of 1,200 kilowatt hours of renewable electricity.

What will I receive for my contributions?

Most important, you will receive the satisfaction of knowing that you have made a difference for the environment, economy, and energy security. You also will receive Keosauqua Green certificates and other recognition for your support.

Will I receive renewable energy directly to my home or business?

The renewable facilities supported by your contributions will feed power into the overall electric system. The electricity flowing to your home may not be directly from a renewable facility, but you'll know that your contribution is supporting renewable generation.

Will power to my home or business depend on the wind blowing or the sun shining?

No, your power will continue uninterrupted.

How do I participate?

Use the form on the back of this brochure to send in your contribution.
