

From Orient Municipal Utilities

Yes, I would like to support the use of renewable energy through Orient Municipal Utilities.

I have enclosed a check for:

___ \$5 ___ \$10 ___ \$15

___ \$20 ___ \$25 ___ \$50

___ \$ _____

I understand that my contribution is tax-deductible as a charitable contribution to a municipal government for the public purpose of developing renewable energy. I will receive a tax receipt from Orient Municipal Utilities.

What is GREEN CITY ENERGY?

Green City Energy is a new program from Orient Municipal Utilities. Now the citizens of Orient can join with people all over Iowa to support home-grown, renewable energy. How can you make a difference for Iowa's environment, economy, and energy security? By participating in Green City Energy from Orient Municipal Utilities.

Announcing a new program for home-grown, renewable energy

GREEN CITY ENERGY

From Orient Municipal Utilities

GREEN CITY ENERGY

From Orient Municipal Utilities

Iowa imports 97% of the energy we use -- coal, natural gas, and petroleum -- from other states and nations. What if, instead, we could harness the power of the natural resources we have here in our state? That's exactly what we can do through Green City Energy.

Iowa possesses abundant renewable energy resources, including wind, solar, biomass, methane, solid waste, and wood. Renewable energy can be used to generate electricity, replacing some of the coal, natural gas, and petroleum that we currently use.

Renewable energy is good for our environment, our farmers and rural economy, and our national security. Some renewable sources, such as wind and solar, produce no pollution at all. Others, such as biomass, biodiesel, and wood, are processed in Iowa from agricultural crops and trees grown in Iowa, creating jobs and income. The use of renewable resources decreases our dependence on imported energy.

You can help make Orient a GREEN CITY by supporting the use of renewable energy. Your voluntary contribution will allow Orient Municipal Utilities to develop more clean, green, home-grown energy. Your contribution is tax-deductible.

Green, renewable energy is growing, blowing, and flowing throughout the state of Iowa. Sign up for GREEN CITY ENERGY and help make a difference for Iowa's environment, economy, and energy security.

Questions and Answers about Renewable Energy and GREEN CITY ENERGY

What will it cost me to support renewable energy?

You can contribute any amount you choose. The more funds collected, the more renewable energy Orient Municipal Utilities will be able to develop. Your contribution is tax-deductible as a charitable contribution to a municipal government for a public purpose.

How will my contributions be used?

Orient Municipal Utilities will use customer contributions to help develop new renewable energy facilities, such as wind, solar, biomass, or others.

Will I get renewable energy directly to my home or business?

The renewable facilities supported by your contributions will feed power into the overall electric system. The electricity flowing to your home may not be directly from a renewable facility, but you'll know that your contribution will support renewable generation.

Will power to my home or business depend on the wind blowing or the sun shining?

No, your power will continue uninterrupted.

How do I participate?

Use the form on the back of this brochure to send in your contribution.
