

APPENDIX E

APPENDIX E

FRAMEWORK FOR OPERATIONAL RESPONSIBILITIES

I. General Description Of Midwest ISO's Operational Responsibilities.

The Midwest ISO, Owners, and Users shall be responsible for operational functions set forth in this Section I of this Appendix E. To the extent that there is any discrepancy between the functions and responsibilities of the Midwest ISO, Owners and Users as defined herein, those defined in the Transmission Tariff, the Transmission Tariff shall prevail.

A. Midwest ISO Responsibilities. The Midwest ISO shall be responsible for the following operational functions:

1. The Midwest ISO shall have functional control of the Transmission System as set forth in Section II of this Appendix E and as defined in Article One, Section I, Paragraph L of the ISO Agreement.

2. The Midwest ISO shall review and approve, as appropriate, requests for service and schedule transmission transactions as set forth in Section III of this Appendix E and shall determine available transmission capability (hereinafter "ATC") under the Transmission Tariff as set forth in Section III of this Appendix E, and in Appendix B to the Agreement.

APPENDIX E

3. The Midwest ISO shall implement and administer the Transmission Tariff applicable to the Transmission System and Non-transferred Transmission Facilities as set forth in Section IV of this Appendix E, and in Appendix B to the Agreement.

4. The Midwest ISO shall be responsible for the security of the Transmission System as set forth in Section V of this Appendix E.

5. The Midwest ISO shall offer ancillary services required to support transmission service as set forth in Section VI of this Appendix E.

APPENDIX E

6. The Midwest ISO shall approve the scheduling of maintenance of all transmission facilities making up the Transmission System and shall coordinate with generation owners, as appropriate, the scheduling of maintenance on generation facilities as set forth in Section VII of this Appendix E.

7. The Midwest ISO shall be responsible for operations of OASIS system(s) in accordance with the Transmission Tariff.

8. The Midwest ISO shall monitor and coordinate voltage levels that shall be the responsibility of the control areas to maintain.

9. The Midwest ISO shall be responsible for administering the functions and responsibilities as defined in the Transmission Tariff in its role as the Reliability Authority, Market Operator, Interchange Scheduling Agent and Balancing Authority.

B. Owners' and Users' Responsibilities. As described more fully below, the Owners and Users, as appropriate, shall have the following responsibilities:

1. The Owners shall retain ownership of their transmission facilities comprising the Transmission System, and shall physically operate these facilities, subject to the Midwest ISO's direction, and maintain those facilities, subject to the Midwest ISO's scheduling approval as set forth in Sections II and VII of this Appendix E.

APPENDIX E

2. The Owners who are control area operators shall continue to operate their control areas for local generation control and economic dispatch as set forth in Section III of this Appendix E.

3. The Owners shall provide transmission service through their transmission facilities at the direction of the Midwest ISO pursuant to the terms of the Transmission Tariff as set forth in Section IV of this Appendix E.

APPENDIX E

provide notice to the Midwest ISO, as required from time to time by the Midwest ISO, before taking such facilities out of service.

8. Owners and Users shall be responsible for administering the functions and responsibilities as defined in the Transmission Tariff in their role as Balancing Authorities, Market Participants, Transmission Service Providers and Transmission Operators.

II. Control Over Transmission Facilities.

A. Midwest ISO Control.

1. The Midwest ISO shall have functional control over the combined transmission facilities of the Owners that make up the Transmission System. Appendix H to the Agreement specifies all transmission facilities that initially shall constitute the Transmission System.

2. The Midwest ISO shall periodically review whether the Transmission System facilities under its functional control constitute all of the Owners' facilities necessary to provide reliable transmission service contemplated under the Agreement and the Transmission Tariff.

3. The Midwest ISO may exercise temporary operational control over any Non-transferred Transmission Facilities or associated non-generation facilities of an Owner in order to prevent or remedy a system emergency.

4. The Midwest ISO shall maintain a publicly available registry of all facilities that constitute the Transmission System.

5. The Midwest ISO shall, in consultation with affected Owners, other affected Members, and the Advisory Committee develop, and then revise from time-to-
